Enter a description of the arts integration project your partner team will be developing. Be sure to name the art form(s) and content area(s) you will be using.

- The project that we had our students create is a Clay Animation project. The students developed story boards, characters, sets, taking photographs and then putting it into movie.
- We combined ELA, photography and computer skills to create this unit.
- We collaborated with a alternative education, special education and advanced art class. It allowed all students to be part of this project.
- This was a corporative lesson in which students worked in group of 4-6 students of multiple age, grades, developmental levels and needs.
- All students were able to be successful and part of the process. Each student was given a job they were responsible for.
- Each group of students created a story, set and movie based on the story their group came up with.

It would also be helpful to provide a thumbnail sketch of what you will be doing and why you chose that unit/plan/lesson.

See lesson plan for example

Approximate date when you anticipate implementing your lesson/project/unit.

It took place November 10– December 17
