Enter a description of the arts integration project your partner team will be developing. Be sure to name the art form(s) and content area(s) you will be using. It would also be helpful to provide a thumbnail sketch of what you will be doing and why you chose that unit/plan/lesson.

Kindergarten students will integrate science concepts of force, gravity, push/pull, up and down; math concepts of patterns and breaking patterns; and music concepts of rhythmic and melodic patterns to create movements and instrumental accompaniments to nursery rhymes. We feel this will help in the development of reading skills, fluency and phonetic awareness, as well as in the understanding and application of scientific concepts.

Approximate date when you anticipate implementing your lesson/project/unit.
